A: You need to change y to y + your string length, and also change isFirst to isFirst + your string length. Also your Array has both values and then result, and then some separators. Should be like this:

```
let string = "BlaBlaBlaBlaBla... Привет Иван Иванов!" let str =
string.componentsSeparatedByString(": ") let path = str[0] let extension = str[1] if
extension.characters.count == 1 { // only ".mp4" print(path, extension) } else if
extension.characters.count == 2 { // ".mp3" or ".mp4" print(path,
extension.componentsSeparatedByString(".")) } else { // more than one "." means any extension
print("your file name is missing the extension") } print("----") if extension.characters.count == 1 { let
result = str.componentsSeparatedByString(": ") print(result) } else if extension.characters.count ==
2 { let result = str.componentsSeparatedByString(".") print(result) } else { let result =
str.componentsSeparatedByString(".") print(result) } output: BlaBlaBlaBlaBla... Привет Иван Иванов
! BlaBlaBlaBlaBlaBla... Привет Иван Иванов ! BlaBlaBlaBlaBlaBla... Привет Иван Иванов ! ----
BlaBlaBlaBlaBlaBla... Привет Иван Иванов ! BlaBlaBlaBlaBlaBla... Привет Иван Ив
```
